EXPERIENCE

10/2017 —
present

Software developer

RT-RK

Currently working on an Android mobile application for facial recognition and emotion detection.

10/2016 —
present

Teaching Associate, Department of Computer Science

Faculty of Mathematics, University of Belgrade

Teaching courses, organising and grading exams. Courses taught: Introduction to programming, Introduction to object oriented programming and Introduction to computer organisation and architecture

07/2016 —
10/2016

Intern

ESDL (Electronics Systems Design Limited), Malta

Implemented a server RaspberryPi with UART communication. Implemented in C, using OpenSSL

05/2016

Intern

sTech d.o.o. Belgrade, member of UNIQA Group Austria

Worked within three teams in order to get introduced to the system used for processing insurance policies.

EDUCATION

2016 —
present

Master's Degree in Computer Science

Faculty of Mathematics, University of Belgrade

Currently learning about machine learning, functional programming, automated reasoning, etc. GPA 10 out of 10.

2012 —
2016

Bachelor's Degree in Computer Science

Faculty of Mathematics, University of Belgrade

Passed many courses that covered important topics such as algorithms, object oriented programming, Unix system programming, etc. Graduated as one of the best students in the generation. GPA 9.61 out of 10.

2008 —
2012

High School

Grammar School, Valjevo

Finished with several awards for good students. Was a member of the school choir and took part in various music manifestations.

AWARDS AND ACTIVITIES

2016

Dositeja scholarship: a scholarship awarded to 800 best students of undergraduate studies in Serbia.

10/2016

Brand New Engineers Hackathon, team Schwifty, 3rd place.

PROJECTS

Minipascal to flowchart: A small program that compiles a small subset of Pascal into a LaTeX flowchart, written in C++ using Flex and Bison.

Turing machine: A Turing machine simulation, written in Java.

Origami simulator: A group project written in C++ using STL and Qt libraries. Implemented the data structure, serialization and several smaller tasks.

Minesweeper: An implementation of the game written in Java.
